DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 17-32 are rejected under 35 U.S.C. 102(b) as being anticipated by either Japanese document (61-211409) or Wipo '107 or Mayer (US 3152568).

Japanese document (61-211409) , Wipo '107 and Mayer (US 3152568) all teach a deployable apparatus for creating a local reduction in wave height, the apparatus having a length dimension and a width dimension, the length dimension being greater than the width dimension and the apparatus being configured so that, in use, the length dimension is generally parallel to the predominant wave direction, the apparatus comprising at least one a buoyant or semi-buoyant upper surface ~~portion~~ ~~operatively~~ member having an upper surface and a lower surface and being disposed in use at or near the water surface; and an array of shaped drag inducing elements disposed adjacent the lower surface, wherein the drag inducing elements are collapsible or compressible when not in use.

Response to Arguments

3. Applicant's arguments with respect to claim 17 have been considered but are moot in view of the new ground(s) of rejection.
